How to pickpocket proof your purse or shoulder bag

Nothing will keep thieves out of your purse if you leave it on the restaurant table, hooked over the chair back, on the grocery cart or any other place where it is not on your person.

Ideally, your purse should be in your hand, over your arm, over your shoulder or across your body at all times. Across your body is the safest but, even there, pickpockets can slip a hand into your purse and remove your wallet without your noticing it.

IF your purse is on your body, if you are wearing it, this simple device will stop pickpockets from stealing your valuables because they cannot do so without your feeling it. It is so difficult, they don't even try.

You'll need two small items from the hardware.

One or two split rings, like those in key rings.
One swivel snap bolt.

Swivel bolt

Split ring

front

side

1. First feed swivel end of snap bolt into a split ring.
2. Inside your purse, choose a compartment that closes with a zipper where you will keep your wallet and other valuables.
3. Feed the slip ring through the hole in the zipper tab.
4. When the zipper is closed, snap the bolt onto the ring that attaches the strap to your purse.

5. If too short to reach, feed the second split ring onto the ring that attaches the strap and snap the bolt onto that.
6. If the strap does not attach with a ring but is sewn to the purse, buy a large size split ring and feed the entire strap into the ring.
7. Either snap the bolt onto this large ring or feed another small split ring onto the larger ring and snap the bolt onto that.
8. To be super safe, attach a second set to zipper tab on another compartment. Twist together before attaching to strap.

"Embezzle" the fact-finding guide that will expose discrepancies in your accounting records and allow you to proceed on fact, not suspicion.

Most owners and managers are reluctant to accept embezzlement as a possibility because, if both their staff and their accounting is suspect, they believe there is no other solution than to hire their CPA to conduct an audit which will cost big bucks and may find nothing at all. That being the case reliable CPAs are reluctant to do an audit on the basis of suspicion alone. Owners and Managers then find themselves in a no-win situation, unable to go further,

"EMBEZZLE" is the solution! It's how you find the evidence, if there is any. EMBEZZLE" is not set up like an audit. It works from the inside, like a bookkeeper does. If there are discrepancies to be found, you'll have documentation: what it is, where it is. You'll be operating on fact, not suspicion.

With the instructions in "EMBEZZLE" you can easily do it yourself. If you need a little fine-tuning of your bookkeeping skills, consider **Bookkeeping Basics**. If you don't have the time or desire to follow "EMBEZZLE" yourself, hire someone to do it for you on a temporary/part-time basis. I suggest an outsider, a retired full-charge bookkeeper with years of experience, a high school education and a clean record

EMBEZZLE

- *How you are setting yourself up for embezzlement.
- *How your Financial Statements hide embezzlement.
- *19 Common embezzler tricks and how they work.
- *If you're not seeing evidence of embezzlement, why bother to look for it?
- *How to make sure you can access your records.
- *What to do **RIGHT NOW!**
- *What's so important about keeping your investigation secret?
- *What to do now to recover money later.
- *Exactly how to access bookkeeping accounts and find what you're looking for.
- *How to massage bookkeeping data in excel to reveal vital clues.
- *How to check the hard copy files for what IS and is NOT there.
- *If your suspicions are confirmed, what to do next, absolutely NOT do?
- *Other Risks.
- *Prevention **METHODS** that make embezzlement almost impossible.
- *How to Limit your exposure.
